Energy Management Leadership Awards	3
Why ISO 50001?	4
2020 Award Recipients	5
Achievements: Award of Excellence in Energy Management Recipients	8
Achievements: Energy Management Insight Award Recipients	13
List of Participating Organizations, by Sector	56
List of Participating Organizations, by Country/Region	57

In 2020, 46 organizations received global recognition.

This booklet highlights their successes using the ISO 50001 energy management system standard.

The **Clean Energy Ministerial's Energy Management Working Group (EMWG)** has been driving the global dialogue on quality ISO 50001 implementation since 2010.

To showcase leading organizations and share their ISO 50001 energy management successes, the EMWG organizes the Energy Management Leadership Awards.

To qualify for these awards, organizations prepare case studies to share a high-quality and replicable description of their ISO 50001 implementation and certification, resulting business benefits, and useful advice on lessons learned and keys to success.

An independent panel of international energy management experts select the winners.

Four organizations receive the top honor, the Award of Excellence in Energy Management, at the eleventh Clean Energy Ministerial (CEM11):

- CTBC Financial Holding Co., Ltd.,
- JK Tyre & Industries Ltd.,
- PT Indofood CBP Sukses Makmur Tbk. Noodle Division, and
- Tipperary Co-Operative Creamery Limited.

Another 42 organizations received Energy Management Insight Awards for helping to build global insight on the benefits of energy management systems.

This booklet highlights the business benefits achieved by the awardees through use of ISO 50001 (currency for cost savings are listed in United States dollars). All awardees are listed on page 5, and at the end of the booklet, awardees are listed by country and by sector.

Clean Energy Ministerial

The Clean Energy Ministerial (CEM) is a high-level international forum that promotes policies and programs to advance clean energy.

Through the EMWG, government officials worldwide share best practices and leverage their collective expertise to accelerate the use of EnMS in industry and commercial buildings.

Governments participating in the EMWG include Argentina, Australia, Canada, Chile, China, Denmark, the European Commission, Germany, India, Indonesia, Japan, Mexico, Republic of Korea, Saudi Arabia, South Africa, United Arab Emirates, and the United States. The EMWG was launched in 2010 by the CEM and International Partnership for Energy Efficiency Cooperation.

www.cleanenergyministerial.org/EnergyManagement

ISO 50001 is a framework to help organizations of all sizes and in diverse sectors continually improve their energy performance and reduce emissions.

Why ISO 50001?

Countries and organizations are looking for strategies to reduce energy and carbon emissions. A strategic approach to energy management has demonstrated value. Energy efficiency is the least expensive, most quickly deployable, and cleanest of all energy resources.

ISO 50001 Energy management systems – Requirements with guidance for use (or simply “ISO 50001”) is the international energy management standard that represents the efforts of over 50 countries from around the world to develop an international best practice to help organizations better manage energy.

Leading organizations around the world are achieving their energy and carbon reduction goals using the global ISO 50001 standard for energy management systems. These organizations are proving the business value of ISO 50001 and paving the way for its broad implementation.

The CEM Energy Management Leadership Awards highlight the clear energy, environmental, and business benefits achieved by the diverse types of organizations that invest in energy efficiency.

More than 75 percent of the 2020 class of awardees are in the industrial sector, 17 percent are in the commercial sector, and the remainder are in the public sector (municipality, airport, and school). The majority of the 2020 awardees represent a single facility, but 28 percent have leveraged their energy management expertise across multiple facilities to multiply their savings.

Collectively, all 46 of the 2020 winners (representing 368 facilities in 14 countries) report annual energy cost savings of up to USD 37 million and emissions reductions of up to 452,000 metric tons of carbon dioxide—the equivalent of taking 95,000 passenger vehicles off the road.

In 2020, the Clean Energy Ministerial honored four organizations with the Award of Excellence in Energy Management:

CTBC Financial Holding Co., Ltd.

CTBC Financial Holding Co. Ltd. pursued ISO 50001 and other ISO standards at its CTBC Bank headquarters in 2012, then certified 152 bank branches. Galvanized by the energy and environmental benefits achieved by CTBC Bank, other CTBC subsidiaries followed suit, with 194 sites eventually certified to ISO 50001. Over seven years, CTBC Holdings increased energy performance 16 percent and cut carbon emissions by 5,316 metric tons.

JK Tyre & Industries Ltd.

JK Tyre & Industries Ltd. adopted ISO 50001 at its Vikrant Tyre Plant in 2013 to help shrink its carbon footprint from fossil fuel use 70% by 2023—while increasing production. Over the past seven years, the plant has cut its emissions (CO2 equivalent) by more than 71 tons and reduced its energy costs by US \$1,888,262. The EnMS helped the plant establish strong internal and external communications and clearly define criteria for efficiently operating and maintaining all significant energy-using equipment to maintain and grow its savings.

PT Indofood CBP Sukses Makmur Tbk. Noodle Division

PT Indofood CBP (ICBP) Sukses Makmur Tbk. is a leading maker of instant noodles and the first such manufacturer in Southeast Asia to earn ISO 50001 certification. The ICBP Noodle Division's three certified facilities collectively reduced their energy use by 10.7% over three years—cutting energy costs by US \$830,400 and emissions by 25,526 metric tons (carbon dioxide equivalent). Leveraging a central approach to implementation, the company now plans to extend its EnMS to all 17 facilities in its Noodle Division.

Tipperary Co-Operative Creamery Limited

Tipperary Co-Operative Creamery Limited began setting up an EnMS in 2017 as part of its plan to become carbon neutral by 2030 and comply with Ireland's Energy Efficiency Directive. Over the two-year performance period, the company cut its energy costs by \$562,342 and its carbon-equivalent emissions by 2,918 metric tons. The company now sells the verified energy credits from these savings and reinvests the funds into more energy projects.

CTBC Financial Holding Co., Ltd.

ISO 50001 Certified:

194 sites in Taiwan, China

Cost savings: \$997,361 over 7 years

CO₂ reduction: 5,316 metric tons

JK Tyre & Industries Ltd.

ISO 50001 Certified:

Vikrant Tyre Plant

Cost savings: \$1,888,262 over 7 years

CO₂ reduction: 71,147 metric tons

PT Indofood CBP Sukses Makmur Tbk. Noodle Division

ISO 50001 Certified:

East Java Branch, West Java Branch,
& Central Java Branch

Cost savings: \$830,400 over 3 years
CO₂ reduction: 25,526 metric tons

Tipperary Co-Operative Creamery Limited

ISO 50001 Certified:

Tipperary Co-Operative Creamery
Limited

Cost savings: \$562,342 over 2 years

CO₂ reduction: 2,918 metric tons

In addition, 42 organizations received Energy Management Insight Awards in 2020 for helping to build global insight on the benefits of energy management systems in industrial, commercial, and public-sector facilities.

Anqiu Shanshui Cement Co., Ltd.

ISO 50001 Certified:

Anqiu Shanshui Cement Co., Ltd.

Cost savings: \$3,163,325.87 over 5 years

CO₂ reduction: 910,947.69 metric tons

Astarta-Kyiv
