

Energy Management Leadership Awards

Calling All Global Leaders in Clean Energy

The Clean Energy Ministerial invites your organization to compete for a prestigious award

Submission Deadline: 14 May 2024

www.cleanenergyministerial.org/EMAwards

Companies around the world use the ISO 50001 standard to achieve energy, economic, and sustainability benefits that boost competitiveness. The standard offers a business-friendly way to align corporate objectives with national climate and energy goals. To enter, organizations develop a structured case study showing how their energy management system delivers diverse benefits to their company, community, and country.

CEM Award of Excellence in Energy Management

Up to four of the most exemplary entries will receive the program's top honor. This global award brings high-profile government recognition and media attention.

National Energy Management Awards

Governments may decide to honor organizations submitting top entries from their countries.

Energy Management Insight Awards

All qualifying entries will be recognized for helping to build global insight on EnMS benefits.

Case studies will be shared online as an inspiration and resource for businesses, governments, and other organizations.

Benefits

- Gain prestigious, global recognition for efficient energy management.
- Demonstrate your clean energy leadership to investors, customers, and employees.
- Affirm your organization's leadership in a global gathering of energy ministers and high-level international organizations.

Who Should Apply

Organizations with a current ISO 50001 certificate issued by an accredited certification body.

Winner Selection

Renowned experts from around the world serve as judges.
